

Patterning & Algebra

Types of Patterns		
Repeating	Growing	Shrinking
The pattern core repeats itself the same way each time	The pattern gets bigger in the same way each time	The pattern gets smaller in the same way each time
<u>A B B</u> A B B A B B A B B A B B	A B A B B A B B B A B B B B	A B B B B A B B B A B B A B
2, 6, 5, 2, 6, 5, 2, 6, 5 (the set or core repeats)	2, 4, 6, 8, 10 (rule: +2 each time)	28, 26, 24, 22, 20 (rule: -2 each time)

Operation	Language	How to use it
Addition	plus, more, all together, both, all, increase, join, join, or, total, sum	$\underline{\quad} + \underline{\quad} = \underline{\quad}$ $\underline{\quad} + \underline{\quad} = \text{sum}$
Subtraction	minus, take away, less, difference, remove, less than, left over, decrease, reduce, remains	$\underline{\quad} - \underline{\quad} = \underline{\quad}$ $\underline{\quad} - \underline{\quad} = \text{difference}$
Multiplication	times, by, groups of, sets of, multiply, per, product, factors, multiples	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$ $\underline{\quad} \times \underline{\quad} = \text{product}$
Division	divide, share, each, out of, equal groups, average, evenly, every, ratio, split, quotient	$\underline{\quad} / \underline{\quad} = \underline{\quad}$ $\underline{\quad} / \underline{\quad} = \text{quotient}$

Variable = Missing Number	
$\underline{A} + 6 = 10 \rightarrow A = 4$	$16 - \underline{N} = 9 \rightarrow N = 5$
$8 \times \underline{C} = 48 \rightarrow C = 6$	$72 / \underline{R} = 9 \rightarrow R = 8$

Multiple Variables		
$\underline{A} + \underline{A} = 20 \rightarrow A = 10$	$\underline{A} + \underline{B} = 20 \rightarrow A \neq B$	$(\underline{A} \times 2) + \underline{B} = 20 \rightarrow A = 7, B = 6$
A = the same number	A & B are different numbers	A & B are different numbers and all have to work together
